

AURORA³
LED

 **SKYTRON[®]**
TRUSTED PARTNER | PROVEN SOLUTIONS

The Ultimate LED Surgical Light

Skytron brings today's most advanced technologies to the Aurora 3 Series surgical lights, giving you everything you need for quality patient care. Intensity, focus and positioning are controlled from the center sterile handle and allow you to comfortably achieve the visibility required for every procedure.

As one of latest advancements in surgical lighting technology, the Aurora 3 is designed to deliver a higher standard of safety and efficiency. With the unique Vertically Segmented Reflector Design (VSRD), the lights reduce shadows and give you a clear, homogenous spot. In addition, the 360° rotation, stunning color accuracy and selectable color temperature allow flexibility and precision, while the energy-efficient LEDs now feature an expected life of 40,000 hours.

The Aurora 3 Series combines today's most sophisticated technology and eco-friendly operation into one light. Best of all, the reliable performance allows you to keep your focus on the patient.

Skytron Aurora 3 LED lights offer multiple configurations for every application.

*Optional Precision HD
High Definition Camera*

By rotating the sterile handle, the surgeon can achieve maximum intensity at any distance without moving the lighthouse.

Selectable color temperature for every procedure based upon each surgeon's individual needs and preferences.

4,500K Color Temperature
(Bright White)

4,100K Color Temperature
(Soft White)

Contact your Skytron Distributor Representative for a consultation on which Skytron lighting configuration will work best for you.

INNOVATIVE SOLUTIONS FOR THE OR, ER AND EVERY ROOM IN BETWEEN

Printed with agra-based inks, water based coatings on FSC®-certified paper.
